# Introduction

## What does it do?

Simple Frequently Asked Questions (FAQ) plugin with answers optional in categories. Made with Extbase en jQuery. Since irFAQ gave me some problems on TYPO3 4.4+ I decided to build a new FAQ plugin.

New version 2.x includes a cool on the fly "while you type" searchform, improved and independent toggling of answers and all Javascript has moved to the footer.

Version 3.x is for TYPO3 6.2.

## Screenshots

### Frequently Asked Questions

Donec congue dolor ac leo vulputate sagittis vestibulum leo elementum. Nam vel magna augue. Nam sed nulla ac tortor sagittis malesuada eu vitae enim. Nam vehicula suscipit vestibulum.

Quick search FAQ

### About our products

Hide all answers

What are your products?

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse justo lectus, pellentesque et molestie at, rhoncus volutpat diam. Fusce mauris dui, feugiat id aliquet quis, rhoncus ac lacus. Cras sit amet erat turpis. Nunc ac massa purus. Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Ut viverra porttitor orci, in adipiscing libero accumsan vitae.

How can I lorem ipsum?

Nam sed mollis urna. Integer et nisl nunc, a mollis neque. Integer aliquet, odio a sagittis pretium, nulla odio tincidunt turpis, vel scelerisque felis diam nec libero. [So make here a link!](#)

Why do you ipsum lorem?

Nam non nisl sed risus tempor adipiscing. Sed pulvinar convallis augue, vel lobortis ante lacinia id. Donec congue dolor ac leo vulputate sagittis vestibulum leo elementum. Nam vel magna augue. Nam sed nulla ac tortor sagittis malesuada eu vitae enim. Nam vehicula suscipit vestibulum.

Are you sure you need another FAQ extension?

Cras est nisi, interdum ac vulputate ut, volutpat non velit. Praesent in ligula nulla. Quisque adipiscing pharetra velit in congue. Morbi non neque orci, eu molestie elit. Duis eu lorem erat, quis iaculis risus. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus.

### Our service

Show all answers

What is Lorem Ipsum

Why would I need your service?

Nam non nisl sed risus tempor adipiscing. Sed pulvinar convallis augue, vel lobortis ante lacinia id. Donec congue dolor ac leo vulputate sagittis vestibulum leo elementum. Nam vel magna augue. Nam sed nulla ac tortor sagittis malesuada eu vitae enim. Nam vehicula suscipit vestibulum.

Can I Lorem Ipsum your website?

## Users manual

1. Install the extension. This extension needs Extbase and Fluid extensions to be installed.
2. Include static template jpFAQ
3. Create records of categories (optional)
4. Create records of questions, choose categories in question record (optional)
5. Insert General Plugin on a page, choose jpFAQ plugin under plugin tab. Save and then under Plugin tab choose page or folder with question records. Choose a category if you want. If empty category all will be shown.
6. Insert plugin again for each categorie (optional).
7. If you want the cool on the fly quicksearch, check checkbox. This searchform searches all questions and answers of the whole page, so I would include this only once.

## Administration

Remove jQuery in typoscript if you have your own library included.

The searchform hides immediately all questions (and answers) which do not contain the terms you type in the searchbox.

If you do not want to use list items you can configure the Quicksearch.js by changing the last line

```
$('#input#jpfaqSearch').quicksearch('.tx-jpfaq-pi1 li');
```

Demo and nice tweak tricks of the original jQuery quickSearch : <http://lomalogue.com/jquery/quicksearch/>

# Configuration

## Reference

Property:	Data type:	Description:	Default:
templateRootPath	File	The path to the template. At the moment only List.html is used under jpfaq/Resources/Private/Templates/Question/  The searchform is located under jpfaq/Resources/Private/Partials/searchForm.html If you really need to change it.	
includeCss	File	CSS file for basic styling	
includeJquery.path	File	Path to jquery lib. See also Administration. Remove this if you have your own jquery lib.	
includeQuicksearch.path	File	Path to Quicksearch js.	

plugin.tx\_jpfaq.settings

## Known problems

None yet but let me know.

## To-Do list
